## Best defense fire protection

"I have lived here in Topanga for 11 years. During that time, we lived through 2 wildfires, one of which got to within a quarter mile of the house. I have always felt like we were on borrowed time. But now, having gotten the house treated by Sun FireDefense, I feel much greater peace of mind. I still plan to evacuate if a fire comes close, but I am now confident that the house will still be here when I get back. That is far greater assurance than any amount of insurance can give me."- Brad G. Homeowner in Topanga, CA"Twice over the past decade, my wife and I have seen the flames of wildfires approach the beautiful home we built. Sun Fire Defense was the only company we've come across that offered a fire retardant solution that wasn't last-minute. The process of treating our house was straightforward and took less than a week. Knowing our home and treasured family heirlooms are better protected from fire has given us much greater peace of mind. Thank you!"-Claude C. Homeowner in Rancho Santa Fe, California"We learned about Sun Fire Defense online after being referred by our local Fire Captain, Kevin Buckley. We decided to treat our house based on testimonials from other customers. Insurance had also requested that we put a fire-resistant coating on the house. The crew was fast and courteous and we now feel safer knowing the property is better protected."-Terri & Dennis C., Homeowners in Painted Cave, CA"I live in a high-fire zone and have an all wood shingle house and I worry a lot about fire. I had a similar treatment done many years ago and was long overdue to have it done again. I was glad to come across Sun Fire Defense."-Marilyn F., Homeowner in Santa Barbara, California"Fires are a constant threat in the area of my residence as there is a large number of Eucalyptus trees to the east and north east of us. This is the direction Santa Ana Winds would bring a threat to our neighborhood. I found out about Sun FireDefense through a mailer that was sent out. Prior to this, I had in mind that a fire retardant application would be wise in light of the threat we face. From the mailer and contact I learned more about intumescent coatings and how it would be applied by a painting contractor to our building. The crew that came out to do the work was knowledgeable and efficient in conducting the work. Now that the work is completed I feel a sense of relief that we have some protection from wildfires."- Henry G. in San Diego, CA Locally and privately owned since 1994, Best Defense operates three offices in Wisconsin , We offer high quality service, inspections, monitoring, and installations throughout Wisconsin. In addition, Best Defense also offers 24-hour service with highly trained technicians available around the clock. Secondly, because we are locally owned, we can provide you with the very personalized service that has our customers recommending us to their friends. Above all, our dedication to quality and commitment to offering the best value has helped our business grow to the point where Inc. Magazine named Best Defense to the Inc. 5000 list of fastest growing privately owned companies in America for 2015.Best Defense offers in house design, Installation, inspections and monitoring all in one easy, simple process. You save time by having all your business needs all in one place.We believe in the importance of doing it right or not doing it at all. With over 25 years of experience, We will always complete jobs properly and cleanly, no multiple calls and fixes.We get it- You don't have time for missed inspections. Our team understand and respects how valuable your time is, we make the process streamlined and easy for you.Best Defense technicians are passionate about their work and and will teach you what you need to know to get up and running safely, no confusing unexplained security systems and incorrect alarms.Carter was incredibly helpful with my smoke detector/fire prevention questions despite the fact that they did not lead to any business for his company at this time. I will certainly use him in the future.I want to take a moment to give a rave review for your service rep, Tim. He is always responsive, informative, professional and very helpful. He represents your company well and is a tremendous asset to your team :)Excellent products and great customer service! We feel so much safer with our new security system.Best Defense helped us solve a fire alarm failure at our apartment complex in Madison today. We'd never done business with them in the past but were treated like longtime customers. They responded quickly and Carter was helpful and knowledgeable. We couldn't be more impressed with the service we received.Best Defense has always been helpful. Mina, their IT tech solved my problem quickly and efficiently. He followed up to make sure I was pleased. Great organization.It was nice to work with a company that gets the job done right. Their team was informative, quick to respond and exceeded our expectations. We will be working with them again on future projects! Collins Aerospace offers a broad range of fire protection systems for commercial and military aircraft, as well as military ground vehicles. Our advanced fire detection and suppression systems protect aircraft, cargo bays, crew bays, occupied spaces and more in extreme environments. As industry leaders in the development, testing and manufacturing of fire protection systems, millions of lives depend on our reliable, low maintenance products to easily integrate with existing systems. Our detection systems include optical, infrared imaging and thermal technology. These advanced technology systems ensure false alarms are relics of the past. Rely on our systems for accurate indicators of danger, so you can act without hesitation. Aviation Collins Aerospace aviation fire protection systems represent the best in innovation and technology. Our products are light weight and integrate well with other systems. By design, our products require minimal maintenance and remain functional at high altitudes. Building reliability and durability with advanced technology is our focus in all of our aviation fire protection systems. Military ground vehicles Collins Aerospace takes pride in equipping our military with field tested fire explosion protection systems for ground vehicles. Trusted aboard military vehicles worldwide, our systems have the durability needed to remain reliable and mission-ready in every unforgiving environment. With high false alarm immunity, our sensors intelligently validate a true threat before actuating. Find out more at our Kidde websites Kidde Aviation Kidde Defense Kidde Commercial Ground Vehicles Detecting and suppressing fires in milliseconds, our systems enhance crew survivability in the most challenging environments.
